Projects

COVID Appointment Website　　　　05/2021-in progress
Personal Project – to learn Web Design
- Self-Started project to make use of the Covid appointment booking API by Indian government. Still in progress for now, but hope to reduce the complexities and make use of JavaScript for Web Designs. Started as an effort to become familiar with CSS and develop Technical Skills.

Phone Shop and Accounting Project　　　　01/2019 - 02/2019
Vatsalya International School, Gujarat, India
- Project was completed in TurboC++, using data files, User had the convenience of reviewing old records and comparing sales from different years, made the user interface 95% more user friendly by using Graphics.io.
- Project was a personal attempt to understand more about how Data is stored in files and how compiler makes sense of it using different commands.

Hotel Management Software　　　　11/2018 - 12/2018
- Finished the project using Java with data being stored in .txt files and done in lab under supervision, system used linked lists to store and read data from the file. This made the program have a much more cross compatible.
- Data could easily be updated and user could search details about the room easily, and user could either book or unbook a room easily with the help of the software.
